Education

Gettysburg College — Gettysburg, PA
Bachelor of Science in Computer Science, Minor in Mathematics — *Aug. 2024 – May 2028*

Experience

Webmaster — May 2025 – Present
Association for Computing Machinery — *Gettysburg, PA*

- Contributed to the development of a Latex contest platform by building frontend features with React, Tailwind, and Motion.
- Implemented a secure admin panel with authentication, contest/user management, and submission tracking, streamlining platform administration.
- Redesigned and optimized key pages for clarity, accessibility, and mobile responsiveness, improving student engagement and usability.

Tech Team — Aug. 2025 – Present
Office of Student Activities and Greek Life, Gettysburg College — *Gettysburg, PA*

- Set up and operated sound, lighting, and projection systems to meet the technical requirements of diverse campus events.
- Troubleshot and resolved equipment issues quickly under pressure, maintaining event continuity and quality.
- Collaborated with organizers, performers, and staff to adapt technical setups to changing needs and last-minute adjustments.

Student Office Assistant — Aug 2024 – Present
Center for Student Success, Gettysburg College — *Gettysburg, PA*

- Manage front desk operations, answering 20+ calls and assisting 15+ walk-in visitors daily with timely support and clear communication.
- Coordinate scheduling, documentation, and records management, ensuring efficient delivery of services for hundreds of students each semester.
- Direct inquiries to appropriate staff and resources, strengthening student access to academic and support services.
- Maintain confidentiality while multitasking in a fast-paced environment, ensuring smooth and professional office operations.

Projects

GitLog | *Express, PostgreSQL, EJS, JWT Authentication* — July 2025 – Aug 2025

- Built a full-stack web app to track and manage books with notes, ratings, and search functionality.
- Integrated JWT authentication with cookie support, enabling secure user sessions and protecting private routes.
- Implemented a shared database connection pool for improved performance and scalability.

Birds of a Feather | *Java, JavaFX* — April 2025 – May 2025

- Built an interactive solitaire game in Java and JavaFX with smooth animations and a polished GUI.
- Applied OOP principles and event-driven programming, improving maintainability and user experience.

Hennest | *React, Supabase, Clerk, TailwindCSS* — March 2025 - April 2025

- Developed Hennest, a financial management platform using React and Tailwind CSS, that allows users to connect their bank accounts, set spending goals, and get alerts when they're close to or exceed their budget.
- Integrated financial APIs to track user spending, provide monthly summaries, and suggest ways to save money based on spending habits.
- Delivered a functional MVP under hackathon constraints, gaining mentorship and exposure to startup-style development.
